PROFILE

DevOps/SRE engineer with **5 years** of experience in **Kubernetes** environments. I specialize in **cloud migrations**, **GitOps**, and **cluster security**. I work end-to-end on infrastructure, from **design** to **production**, with a highly pragmatic approach: I **prototype**, **test** (notably using a **homelab**), and then implement in **production**.

EXPERIENCE

SRE Engineer

2023 – Présent

Equasens . Nancy, France

- **Administration** and **operations** of large-scale production environments (**1000+ VMs** and virtualized infrastructure)
- **Migration** of **applications** and **databases** to containerized and **cloud-native architectures**
- **Implementation** of automated deployment **pipelines** and improvement of **delivery processes**
- **Monitoring,** performance **analysis,** and **incident management** on distributed **systems**
- **Infrastructure automation** and **contribution** to technical **architecture design**
- **Management of cloud** environments and deployment of high-performance workloads (ML / GPU)

Postgres Mysql Kafka Redis RabbitMQ Loki PMM Prometheus Grafana Alertmanager

DevOps Engineer

2020 – 2023

Inovea Conseil . Nancy, France

- Development and integration of a **CI/CD** pipeline, strengthening **code quality** and **information system security**
- Implementation of containerized development environments using **Docker** and **dynamic Docker Compose**, improving **reproducibility** and **onboarding**
- Analysis of client requirements and **evolution** of the **Dolibarr** ERP, with the **addition of features** tailored to business needs
- **Formalization** of **procedures** and **deployment** of **DevSecOps best practices**, standardizing development and **security processes**

Docker Dolibarr Mysql Jenkins Snyk Quodana PHP

HomeLab

2022 – Présent

- **Design of a homelab:** a **2-node Proxmox** VE cluster with a dedicated **network**, and **automated deployment** of a Kubernetes cluster using **Talos** Linux, fully **documented** on **GitHub**
- Implementation of a **GitOps** ecosystem**: multi-cluster** management with **Argo CD** and **Renovate**
- Deployment of **hyperconverged** distributed storage using **LINSTOR (DRBD),** exposed via **CSI** on **Kubernetes,** with **snapshot** capabilities implemented
